

Artificial Turf has come a long way since the first 'carpets'. Athletes love the ball action and 'feel' of PolyTurf®. The recycled rubber infill material provides a shock absorbing footing combined with the traction and release characteristics of natural grass. And the surface is usable and retains its features in all weather conditions.

Field lines and logos are permanent inlaid fiber - no paint or chalk.

Superb playing surfaces can be designed and professionally installed to suit any sport or other activity played on grass. Lacrosse, Tennis, Field Hockey. Lawn Bowling Croquet and Cricket are a few examples as well as those shown.

"8 Year Warranty"
